NTH BRAIN / GRAPH INGESTION SAMPLE

Northstar Labs Support Pilot

Project brief and relationship map | 29 October 2026 | Fictional data

Purpose

[[Northstar Labs]] is a fictional software company. Its [[Support Pilot]] will test a faster customer support process over four weeks, from 2 November to 27 November 2026. The pilot belongs to [[Customer Support Team]] and serves a small group of existing customers.

The desired outcome is the [[Eight-Hour Target]]: reduce average first response time from 24 hours to 8 hours. The [[Response Time Dashboard]] will measure the target each weekday. This goal is a proposed target, not a guarantee.

Ownership and delivery

[[Maya Chen]] owns [[Support Pilot]] and leads [[Customer Support Team]]. [[Alex Tan]] owns [[Ticket Routing]] and configures the routing rules. [[Priya Rao]] owns [[Response Time Dashboard]] and checks data quality. [[Sam Lee]] owns [[Knowledge Base]] and updates customer-facing articles.

Pilot schedule

Week 1: Alex configures [[Ticket Routing]] and Sam reviews [[Knowledge Base]]. Week 2: Priya validates [[Response Time Dashboard]]. Week 3: Maya reviews [[Customer Feedback]]. Week 4: the team decides whether to expand [[Support Pilot]].

Names in double brackets identify entities for the knowledge graph. All people, companies, dates and facts in this document are fictional.

PEOPLE, SYSTEMS AND OUTCOMES

How the work connects

Each paragraph describes a relationship supported by this sample source.

Team and organization

[[Northstar Labs]] employs [[Maya Chen]], [[Alex Tan]], [[Priya Rao]] and [[Sam Lee]]. [[Maya Chen]] leads [[Customer Support Team]]. The team runs [[Support Pilot]] for [[Northstar Labs]].

Process and tools

[[Ticket Routing]] assigns new tickets to [[Customer Support Team]]. [[Ticket Routing]] depends on [[Knowledge Base]] because routing categories reference its article topics. [[Alex Tan]] owns [[Ticket Routing]].

[[Response Time Dashboard]] reports the first-response metric for [[Support Pilot]] and tracks [[Eight-Hour Target]]. [[Priya Rao]] owns [[Response Time Dashboard]]. [[Sam Lee]] owns [[Knowledge Base]].

Decision and risk

[[Pilot Approval]] is the decision to run [[Support Pilot]]. [[Maya Chen]] approved it on 29 October 2026. The decision limits the pilot budget to USD 8,000.

[[Weekend Coverage]] is a risk to [[Eight-Hour Target]] because the team has limited weekend staffing. [[Maya Chen]] will review the risk on 16 November 2026. [[Customer Feedback]] informs the week 4 decision to expand or end [[Support Pilot]].

RELATIONSHIP CHECKLIST

Evidence for the graph

Use the exact entity names below when creating linked wiki pages.

- [[Support Pilot]] is owned by [[Maya Chen]] and is run by [[Customer Support Team]].
- [[Customer Support Team]] belongs to [[Northstar Labs]].
- [[Ticket Routing]] is owned by [[Alex Tan]] and depends on [[Knowledge Base]].
- [[Knowledge Base]] is owned by [[Sam Lee]].
- [[Response Time Dashboard]] is owned by [[Priya Rao]] and tracks [[Eight-Hour Target]].
- [[Pilot Approval]] approved [[Support Pilot]]; [[Maya Chen]] made the decision.
- [[Weekend Coverage]] threatens [[Eight-Hour Target]] and is reviewed by [[Maya Chen]].
- [[Customer Feedback]] informs the decision about [[Support Pilot]].

Verification notes

The graph should include separate nodes for the people, organization, team, pilot, systems, goal, decision, risk and feedback. Links should be traceable to these pages. Do not infer additional people, dates or outcomes.

Open the resulting Nth Brain pages to check the evidence before relying on a graph relationship.
